JOINT BASE ANDREWS, MD / DC METRO / TRAVELS TO MARKET SITES

Shanida K. Harvey

Founder, NETWERKS64

Contract PM, site QA, and field reporting setup for telecom contractors.

30 yrs Telecom, copper to 5G	**400+** Site projects at AT&T
9 yrs Cell site field engineering	**2 vendors** Construction vendors, 10 to 15 projects each

What I do for contractors

Technical PM and vendor management

Outage requests, operations tickets, and site concerns handled between vendors, stakeholders, and RF/RAN. Vendor calls twice a week, dates aligned across three databases, weekly status up the chain.

Site audit and QA

Site ready before the crew rolls. After the work, I verify the closeout for the proper information and photos and pass or fail it. Corrective actions tracked to closure. JHA review. OSHA-30. PIM and sweep results reviewed from the tester's own reports.

Field reporting and closeout setup

DFR and closeout templates matched to the customer's format, photo and test checklists, and the handoff automated with n8n, ClickUp, and Google Workspace.

Experience

2025 to present — **Founder**
NETWERKS64, Maryland (LLC filed June 2026)
Telecom reporting and closeout tools, plus Tradeslip for general contractors. Three products, website, store, and fulfillment automation.

2022 to 2025 — **Senior Technical Project Manager, Construction and Engineering**
AT&T, Columbia, MD
Point person between the vendors, stakeholders, and the RF/RAN team for anything site related. Two construction vendors on a rolling load of 10 to 15 projects each, new projects every one to two weeks. 400+ site projects over three years on Mid-Atlantic mobility and modernization programs. Outage tickets across three databases, closeout verification, Swift Trac corrective actions, decommission work orders.

2013 to 2022 — **Field Engineer**
Sprint / Ericsson, Washington, DC
Sprint RF and Clearwire microwave maintenance. Samsung MMBS, Alcatel-Lucent, and Ericsson base station equipment. Alarm interpretation, repair tickets, parts and RMAs. Secure-site access at WMATA, Navy Yard, National Airport.

1996 to 2013 — **Service Technician 3; Installation and Repair Technician**
RCN, Washington, DC (2005 to 2013); Verizon Communications, Landover, MD (1998 to 2003); DCI Enterprise Solutions (1996 to 1997)
Telephony, VoIP, wireless, and low-voltage installs. Telephone infrastructure maintenance.

Selected projects

Mid-Atlantic mobility and modernization program

AT&T / 2022 to 2025 / 400+ sites, two vendors

Fewer truck rolls from readiness checks before dispatch.

Cell site access at WMATA, Navy Yard, and National Airport

Sprint / Ericsson / 2013 to 2022 / Secure sites

Badging, escorts, advance notice. Vendors, internal teams, and government contacts coordinated so the crew finished in one trip.

Global Directory: Women in Trades, Tech & Technical Fields

Founder and curator / 2026 / Verified organizations / shanidaharvey.com/list

Free, shared directory of organizations, programs, events, and awards for women in the trades and tech. Two Google Forms feed a review queue, a live tracker, and formula checks. Built with Gemini, checked with Claude, curated by me.

Free tools: Bid and Proposal Builder and Paperwork Cost Calculator

Telecom field ops managers / 2026 / No sign-up / netwerks64.com

Proposal, RFP, and quote PDFs with nothing saved or sent, plus a yearly paperwork cost calculator.

Open to contract and freelance work. Remote for PM and reporting setup, on site for audits.
